Tour: Aagard

www.aagard.com

Founded in 1997 by Brenton Smith, Aagard has been experiencing exponential growth and nation-wide success in the packaging equipment industry. The Aagard Group LLC designs, engineers and manufactures automated packaging machinery. Aagard proudly maintains a culture that fosters creative thought and collaboration.

Through their continuous effort to redefine the standard, Aagard is delivering packaging systems that give their customers a competitive advantage. Their robust, integrated systems have made them leaders in the packaging industry. Custom built in the USA, Aagard's equipment will meet and adapt to your evolving packaging challenges.

Round Table Discussion

The TSMA board of directors will explore a new method of gathering information from the membership about what members "want" from Tri-State Manufacturers' Association. TSMA's meeting will provide an opportunity for members to give input on several different topics.

Please join the roundtable discussions to interact with your fellow members and influence the role of TSMA regarding:

- Government relations activities and information sharing
- Membership benefits/the value of membership
- Programs and special events
- Workforce development/youth involvement

Please mark your calendar and give some thought to TSMA's role in the above areas. If you are unable to attend the meeting, please call or email the office to share your thoughts.
